

Our main figures

Shared Values and Management Style

The similarity of our management styles enable us to continue on our path of rapid growth and continuous improvement.

Our Management Style is based on the following principles:

- Exceed customer expectations, every time.
- Be passionate about our work and our products.
- Be thorough in all the analysis we do.
- Be flexible and adapt to each customer's needs.
- Enjoy team-working.

EXPERTS IN BEARING SOLUTIONS

FERSAGROUP

Fersa Group

Fersa Group was created through the merger of two European bearing manufacturers: **Fersa Bearings** in Spain and **NKE** in Austria. Both are globally active in the design, production and distribution of high quality bearings for the global automotive and industrial markets.

Over 50 years of manufacturing experience and the trust of leading OEMs, Tier 1 and their respective aftermarkets endorse our products and services.

The group is present on all five continents; with four state-of-the-art factories, six distribution centers as well as four R&D centers, two in Europe and two in Asia, all of them supporting our growing presence in more than 85 countries.

A SPANISH-AUSTRIAN COMPANY

Fersa Bearings

Experts in Bearing Solutions for the Automotive Markets

Fersa Bearings is focused on the innovation and production of high quality bearings for the global automotive markets, specializing in applications for commercial vehicles.

NKE Bearings

Experts in Bearing Solutions for specific Industrial Markets

NKE Bearings is focused on the innovation and production of precision bearings for the global industrial markets, primarily for: Mechanical drives, Electrical drives, Fluids (pumps and compressors) and Agri-technology.

ENG.

A complete range for the most demanding commercial vehicle applications.

We are **OEM & AFM Supplier** of bearings for differentials, wheel ends and axles from major European, American and Japanese brands for the **automotive sector**.

COMMERCIAL VEHICLES

We design and develop together with our customers bearings for American, Asian and European commercial vehicles. We are specialized in transmission and wheel units for some of the most demanding applications.

▪ **Truck:** We provide original equipment and repair parts for major brands, such as Mercedes Benz, Volvo, DAF, Freightliner and Kenworth, among others.

▪ **Trailer:** Fersa bearings cover 90% of trailer applications for major European brands.

▪ **Bus:** Fersa provides complete solutions for buses that help to reduce the maintenance out-time. Thanks to our effectiveness, we are providers of the main Public Bus fleets in South America.

LIGHT AND MEDIUM DUTY

Fersa also offers a wide range of bearings for light and medium duty vehicles. We supply to leading American and Chinese OE manufacturers of vans and pick-up.

▪ **Vans:** Fersa provides most bearings for automatic gearboxes in Vans.

▪ **Pick-ups:** Widest range of TRBs for differential applications for the pick-up segment.

Tapered roller bearings / Cylindrical roller bearings
Ball bearings / Needle roller bearings
Wheel end hub units / Passenger car bearing kits

Innovation

The best product for each application.

Less wear and longer service life for our bearings to achieve maximum efficiency and durability through improved materials and internal geometry of our products.

Expert knowledge at your disposal.

Our experienced engineering teams design and validate all our products under the strictest quality standards at our own advanced laboratories.

We provide leading edge technologies including tribology and surface engineering, FEA and simulations, polymer developments, specialised lubrication and coatings.

Complete engineering loop and testing.

Our capabilities in R&D go from CAD Solid design and Analytical and Virtual modelling to empirical testing and field validation. The numerous in-house test benches also allow us to offer these capabilities to our Tier-1 and OEM customers.

Our own global manufacturing network

Fersa Group has an extensive network of distribution centers that service globally. We count with local facilities in **Austria, Brazil, China, Spain and USA** and state-of-the-art manufacturing centers

in Austria, China and Spain. This way we can deliver on time to all our OEM, Tier-1 and more than 600 distributors all around the world.

WHEREVER
YOU ARE

Quality in everything we do

Suppliers quality: working only with the best.

Our Supplier Quality and Development (SQD) division guarantees the flawless supply of highest quality raw materials and components.

Process quality: accurate, on-time production.

All manufacturing facilities employ a Lean approach in manufacturing, involving every team member in a philosophy of continuous improvement. We have state-of-the-art production lines in all our plants. The integrated manufacturing process controls enable us to check 100% of the parts at every critical production step.

OEM-Quality Products.

We deliver our products to leading global manufacturers of transmissions, axles, differentials and fluid pumps amongst others; these customers use our products directly or integrate them into their Original Equipment.

BEYOND
HARD WORK

Wide range of industrial Bearings with unlimited possibilities.

NKE develops and manufactures **premium quality** bearings for a wide spectrum of **industrial applications**.

INDUSTRIAL APPLICATIONS

Mechanical Drives:

- NKE bearings cover 10kW to 3MW applications.
- Industrial gearbox and wind turbines gearbox.

Electrical Drives:

- NKE develops bearings for all kinds of electrical machinery, such as electric motors, traction motors for rail vehicles or wind turbines, among others.

Fluid Technology:

- We offer a full range of standard and special bearings for high-performance pumps intended for various industries (petrochemical, food, etc.).

Agri-Industry:

- We are official suppliers for leading brands of agricultural equipment such as Lemken, John Deere, NAF and Valtra.
