NKE electrically insulated rolling bearings

- > Simple, effective electrical insulation of bearings
- > Optimum protection against the passage of current

Bearing damage by the passage of electrical current

Under adverse conditions the rolling bearings used in electrical machines can sustain damage through current discharge.

The electrical current passing through the bearing may be caused by

- > Incorrect or faulty wiring
- > Faulty or damaged earth connections resulting in insufficient potential equalisation
- > Unshielded and/or asymmetric wiring in electric motors
- > Asymmetrical magnetic flux
- > Fast acting frequency converters

Damage by current passage: electrical corrosion

Current passage has led to a formation of craters/flutes on the inner ring raceway (fig. 1) and the lateral surface of the rolling elements (fig. 2) of a cylindrical roller bearing

The solutions

The potential for damage can be eliminated by:

- > Ensuring correct wiring
- > Sufficient earth connection
- > Isolated coupling to the electrical machine
- > Electric filters
- > Grounding of rotors and brushes

Moreover, it is advantageous to NKE electrically insulated bearings.

NKE electrically insulated bearings – efficient and effective

NKE provides **bearings with oxide ceramic insulating layers on the bearing ring**. Applied with plasma technology, the insulation has a guaranteed breakdown resistance of at least **1000V AC or DC**.

Two variants are available:

- > **SQ77**: Insulation on the outer ring
- > **SQ77E**: Insulation on the inner ring (Fig. below)

A NKE deep groove ball bearing > with insulation on the inner ring (SQ77E)

- > Fast availability
- > Versatile applications

Overview – Product range and technical data

NKE suffixes	SQ77	SQ77E	
Type of insulation	Outer ring coating	Inner ring coating	
Diameter range [mm]	Outer diameter $90 \leq D \leq 500$	Bore diameter $75 \leq d \leq 150$ with the bore diameter to bearing width proportion $d/B > 3$ (narrow and single row bearings)	Bore diameter $150 \leq d \leq 315$ with width within the range of $20 < B \leq 315$ (wide and double row bearings)
Application	DGBB, CRB, Special types up to D=1000mm on request	DGBB, CRB	DGBB, CRB

Frequently used bearing types in **SQ77** execution (insulation on the outer ring) are available on stock or with short lead times. Examples:

> Cylindrical roller bearings

Design: NJ, NU, NUP
Dimension series: 210-230, 310-330
Cage: brass and polyamide
Radial clearance groups: C0, C3, C4

> Deep groove ball bearings

Dimension series: 6212-6226; 6312-6326
Cage: brass
Radial clearance groups: C3, C4

Other bearing types and SQ77E (insulation on the inner ring) on request.

Advantages:

- > Higher operational reliability through optimum protection against current passages
- > More economical than insulation on housings or shafts
- > Interchangeable: Same dimensions and technical properties as conventional bearings
- > Coating resistant to mechanical damage if correctly handled

Typical applications:

- > Traction motors of railway vehicles
- > Electric motors (AC/DC)
- > Generators (e.g. in wind turbine generators)

NKE headquarters in Steyr – more than 10.000 m² for core functions such as engineering, production, logistics, quality assurance, marketing and sales

NKE AUSTRIA

NKE AUSTRIA GmbH is a premium bearing manufacturer with headquarters in Steyr, Austria. The company was founded in 1996 by a group of senior staff members of the former Steyr Wälzlager.

NKE manufactures both standard and special bearings for all industrial applications. Our core competences – engineering, product development, final processing of components, assembly, quality assurance, logistics, sales and marketing – are centralised in Steyr. The site is accredited with ISO 9001:2008 (design, development, manufacturing and distribution of bearings), ISO 14001:2004 and OHSAS 18001.

We offer:

- Standard bearings with a comprehensive stock range
- Tailor-made bearings for special requirements
- Technical service (e.g. consulting, documentation, training etc.)

NKE bearings are distributed through 18 international representative offices and more than 240 distribution outlets in over 60 countries.
